## Product Overview

`Travolution` product range is a complete end-to-end technology suite, which encompasses our advanced Internet Booking Engine using multiple sources of fares and availability, combined with comprehensive reporting and management capabilities. It is powered by our industry leading caching and fare-pricing engine, ensuring the lowest and most accurate fares all the time at a superb speed!

This product is meant to address the travel booking needs of the traveler, travel administrators and key decision makers in the client and partner organizations. It also provides a single window to the travel agency implant staff, business travel center staff to search and respond to booking queries of their customers. The platform supports 100% tracking of all booking and any further amendments and cancellations to the cart.

## Key Features

- Provide 100% Automated Travel Booking solutions to your clients 24x7.
- Completely online B2E (Corporate), B2B, B2C, Mid-Office and Back-Office interfaces.
- Ability to create a multi-level distribution network (B2B2B and B2B2C) with Sub-agents, Whitelabels, APIs and Distributors.
- One-Click PNR, Ticket and E-ticket print-out generation.
- Exhaustive search result display through Multiple GDS and Supplier APIs.
- Integrations for all products with real-time Filtering, Sorting & Email option for search results.
- Create and manage custom commercials and markups with filters on travel date, booking date, class and sector of booking.
- Create Vouchers for Marketing Campaigns to offer real-time discounts by usage of voucher codes at booking and offer ad-hoc discounting.

When looking for a company to take away the pain from Self Booking Tool development, Zillious looked like an outfit that could handle the job. From the outset, their professionalism, willingness to go the extra mile, observance of deadlines and technical expertise assured us that we were in safe hands. It has certainly been a pleasure to work with Zillious and is also the beginning of a longer term collaboration.

**Travel Tours- Bangalore**

"We were looking for technology partner who could provide a wholesome solution with the ability to cater to the wide set of functionalities for our diverse client base and with ability to adapt to our own custom internal processes. We are glad Zillious has developed and implemented the same for us within our time-frame requirement. Today our clients, across the 18 branches in India, benefit from the superior response times, more seamless & real-time reporting through the Travolution product!"
